

ICLEI South Asia E-News

January 2021

Emani Kumar
*Deputy Secretary
General, ICLEI and
Executive Director,
ICLEI South Asia*

Dear Friends,

We got off to a flying start in January, with an agreement being signed with the Gujarat government to formalise cooperation for the second phase of the CapaCITIES project, which is being supported by the Swiss Agency for Development and Cooperation. The project will provide technical support for the development of innovative financing models for large-scale deployment of climate-resilient infrastructure and the preparation of relevant policies.

Among other key developments, three Reverse Vending Machines were inaugurated in Hyderabad, under the “Enhancing Circular Economy Perspectives - Plastic Waste Management Strategy and Action Plan for Greater Hyderabad Municipal Corporation” project, supported by the IGES Centre Collaborating with United Nations Environment Programme (UNEP) International Environmental Technology Centre (IETC), Japan, with ICLEI South Asia as the implementation partner. It is hoped that the installation of these machines will improve public awareness on the need for creating a circular economy for plastics.

We also released a policy brief on “Local Urban Resilience Plans Using Climate Adaptation Indicators: Development and Integration in National Planning Processes” in Bangladesh at an online session during the Gobeshona Global Conference. The policy brief has been developed under the CDKN programme. Additionally, we launched an initiative jointly with Dhulikhel Municipality in Nepal, under which ICLEI South Asia will help to conduct a voluntary local review of the Sustainable Development Goals as per the strategies set out by the city. There are also reports on the review and documentation of Urban95 programme activities and on the launch of Gangtok’s City Biodiversity Index, Local Biodiversity Strategy and Action Plan and the Illustrated Natural Asset Map of Gangtok in this edition.

We hope you enjoy reading this newsletter and look forward to your feedback.

Latest developments

CapaCITIES Project Consortium Signs MoU with Gujarat for Phase II Implementation

The Government of Gujarat has signed a Memorandum of Understanding (MoU) with the Implementing Agency (IA) of the CapaCITIES project to formalise cooperation with the urban development and climate change departments of the state. Ahmedabad, Rajkot and Vadodara have also entered into an MoU with the project's IA and the above-mentioned Gujarat government departments, to formalise the project's execution in these cities.

Urban95 Children's Fest, Anganwadi Training in Udaipur: Review Shows Positive Reception

ICLEI South Asia organised a two-day festival for children in the 0-5 age group as part of the tactical interventions under the Urban95 programme in Udaipur in early 2020. The festival was organised to build confidence among the care-givers of the children about the plans of the Udaipur Municipal Corporation to provide better urban infrastructure for small children, and to demonstrate that neglected parks could be transformed into ITC-responsive zones.

Gangtok Gets New Tools, Illustrated Natural Asset Map to Mainstream Biodiversity Conservation

The Gangtok Municipal Corporation has approved the City Biodiversity Index, Local Biodiversity Strategy and Action Plan and the Illustrated Natural Asset Map of Gangtok, developed by ICLEI South Asia as part of the INTERACT-Bio project. Mr. Arun Upreti, Hon'ble Minister for Urban Development, Government of Sikkim, recently released the tools and map, which will help to mainstream biodiversity conservation into urban planning. The project is funded by the Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety, Germany, through the International Climate Initiative.

About ICLEI-Local Governments for Sustainability

ICLEI - Local Governments for Sustainability is a network of more than 1,750 local and regional governments, supported by a team of global experts, driving sustainable urban development worldwide. Active in 100+ countries, we impact over 25 percent of the global urban population.

ICLEI firmly believes that sustainable cities are the foundation of a just and sustainable world. We create systemic change in urban areas through practical, integrated solutions and spark city-to-city and city-to-region connections. ICLEI brings a strong urban component to national and global sustainability policy and translates global policy into action. Through our collective efforts, ICLEI is building a sustainable urban world to shift the trajectory of global development.
