Greetings readers!

ICLEI South Asia has always aimed at raising and increasing awareness about ways to make our cities more sustainable and liveable. At the SUNYA International Conference on Solid Waste Management for South Asia in March, we witnessed our cities showcasing remarkable initiatives being taken to move towards a state of zero waste. A workshop was recently organised in Cochin to resolve transport issues of the city and to identify prospective solutions. We, like last year, are also partners for the All India Environment Journalism Competition 2015, for which the details can be found below. These workshops, conferences and numerous events not only increase awareness but also highlight the various steps, ideas and actions that can be taken to make our world a better place to live in.

Our member city Thane was also announced as the National Earth Hour Capital 2015 due to its myriad actions on aggressive renewable energy targets, energy efficiency and multiple solar energy projects. We are proud of all work that our cities are undertaking to advance towards sustainability. Read on for more updates from the South Asia region and beyond.

Happy reading!

Risk award to support slum dwellers in Pune

Activities for risk reduction must integrate the people at risk and make use of their traditional coping techniques and knowledge. All the key drivers of risk are present in the Indian city of Pune where 25,000 people living in ten slums will benefit from a project by the All India Institute of Local Self-Government (AIILSG) which has won the 2015 Risk Award and a grant of €100,000 at the Third UN World Conference on Disaster Risk Reduction. The project reduces disaster risks faced especially by women and children in a slum population.
