### **XI Organizational Information:**

**About ICLEI – Local Governments for Sustainability** ICLEI – Local Governments for Sustainability is a network of more than 2500 local and regional governments, supported by a team of global experts, driving sustainable urban development worldwide. Active in 125+ countries, we impact over 25 percent of the global urban population. ICLEI South Asia – the South Asian arm of ICLEI – Local Governments for Sustainability, aims to build and serve a regional network of local governments to achieve tangible improvements in regional and global sustainability through local initiatives. Over 15 years, ICLEI South Asia has emerged as a strong and vibrant local government association with a membership base of over 75 cities. We promote local action for global sustainability and support cities to become sustainable, resilient, resource-efficient, biodiverse, low-carbon, productive, ecomobile; to build a smart infrastructure; and to develop an inclusive, green urban economy with sustainable procurement with the aim of achieving healthy and happy communities. ICLEI also strengthens North-South and South-South cooperation to advance sustainability at the local regional and sub-national levels. We work with South Asian cities with funding support from various national and international partners by offering various opportunities such as participation in programs and projects, technical inputs, information services, training, conferences, and workshops. We also share our expertise, reach out to cities, initiate interaction, and mobilise funds. Facilitating peer learning, city-to-city exchanges, networking, and supporting the development and implementation of demonstration projects are ways to strengthen the capacities and technical know-how of the cities we work with.
